Certainly the very first thing of this sort that ever was on the market; as generally the Grangers that have been made up for sale have either been compressed into three or four volumes in folio, or bound in quarto volumes, by which means the most valuable and magnificent ornaments of the book are creased and totally spoiled. As this is the most amazing book in the world, and a sort of history of the English people

from the time of Egbert to the Revolution, it is hoped it will meet the approbation and attention of the public, to prevent the great expence of this work being entirely given away, as this and every other article will be sold without reserve
